1. Any allegation, suspicion or report of a sexual assault that includes penetration will be immediately referred for outside medical testing and evaluation.

2. The facility Director or Office of Investigations staff may independently decide that a youth must be referred for outside medical testing and evaluation.

3. Facility/program medical services staff will not perform any forensic examinations. In addition, examinations of alleged perpetrators will be performed by an outside medical provider.

4. The medical services staff will contact the emergency room staff to request that the youth be evaluated for injuries related to the alleged sexual assault, using the sexual assault kit and standard chain-of-custody procedures.

5. Medical services staff must request the emergency room staff to evaluate the youth for sexually transmitted infection(s), perform a pregnancy test (if appropriate), and offer pregnancy prophylaxis.

6. Security staff will not be present in the room during the emergency room physician’s evaluation, unless security needs dictate otherwise.

7. Health information will be kept confidential. The youth will be asked to sign a release of information permitting the hospital to release the records of the evaluation to the facility medical services staff to be placed in the youth’s health record.

8. Medical services staff will provide appropriate follow-up care and treatment. At the follow-up appointment, the youth’s physical and emotional status will be assessed. The provider will review the records from the outside medical facility to determine if all medical aspects of the evaluation were completed.

B. If a youth was assaulted at the facility within the 96 hours prior to the abuse being reported, the alleged perpetrator will be isolated pending collection of evidence. The perpetrator’s room will be considered a crime scene until the evidence has been collected. (See DJJ 8.42, Crime Scene Preservation.)

C. All appropriate staff will respond to each sexual assault occurring at the facility as indicated in the Facility Coordinated Response to a Sexual Assault Incident (Attachment A).

D. The staff member with first knowledge of the alleged sexual assault will complete a Special Incident Report (SIR) and will make supervisor notifications in accordance with DJJ 8.5, Special Incident Reporting. If the youth is referred to the emergency room, the medical services staff will document the referral on the SIR Review of Youth Injury Form.

E. The medical services staff will notify the facility Director regarding the allegation of sexual assault. The alleged sexual assault will be reported to the Department of Family and Children’s Services in accordance with DJJ 8.9, Child Abuse Reporting.
F. Upon return from the emergency room, a new Custody and Housing Assessment will be completed in accordance with DJJ 17.3, Custody and Housing Assessment. The facility Director, or designee, in consultation with the Designated Health Authority will make a final decision regarding housing placement for the alleged victim. The safety, security, and well-being of the alleged victim will be primary in these decisions. The alleged victim will not be housed in the same area as the alleged perpetrator.

G. A master’s level qualified mental health professional (QMHP) will conduct the Behavioral Health Evaluation for the following incidents:

For youth who are not on the mental health caseload, the QMHP will generate a referral for a Mental Health Assessment. Mental health staff will provide appropriate follow-up care and treatment.
